

DIY Beginners Group at POSHBEADS Gallery

A beginner's class with Betty runs you through all the basics you need to know to set up at home to make up jewellery pieces from materials you purchase or to do running repairs and maintenance on your bead jewellery. I can show you basic materials and tools you need to purchase and how to use them correctly. I highlight workplace health and safety issues you need to research and address when setting up at home. We explore working posture, vision and lighting issues and the cheapest solutions available.

Betty has decades of practical experience in jewellery design and manufacture and the tertiary qualifications required to do the job. Pay Betty to share her expertise with you and enjoy receiving the information needed to assist you to plan the DIY bead jewellery projects you can undertake at home as a beginner.

Many crafts people only need one good lesson to get started. This introductory group will facilitate ongoing learning from home based research and practice once you have a very basic tool kit, beading materials and some beads.

Jewellery tuition is 60 minutes - \$37.50 for 1 person – \$27.50 for 2 persons – Group of 4 or more is \$17.50 per person - tax included
